

Advanced Standing

Chemical Engineering

Advanced standing is required to take 300- and 400-level engineering courses. Students must request advanced standing in the second semester of their sophomore year in order to register for their junior-year engineering courses.

It is department policy to grant advanced standing for fall semester of junior year if students are missing only one or two course requirements (a one unit course can also be included like CHEE 201L with the two pending courses) and meet the 2.3 GPA requirements. At the beginning and end of fall semester junior year, students who have not completed the remaining courses or who no longer meet the GPA requirements will have their advanced standing revoked and must spend a year repairing their academic record before they can continue in the program.

For permanent advanced standing, the requirements below must be met.

1. Pass the following courses:

ENGL 101, 102

MATH 122A, 122B, 124 or 125, 129, 223, 254

CHEM 151, 152, 241A, 243A, 241B

PHYS 141, 241

AME 105, 205 or CE 260

CHEE 201, 201L, 202, 203

ENGR 102, 102A and 102B, or substitution (ENGR 102AB is counted in GPA for advanced standing but not considered a deficiency if not taken. Substitution is any ENGR course to replace ENGR 102 prior to graduating. Please consult academic adviser or Engineering Elections options when locating substitution. This substitution cannot be used twice.)

Note that the equivalent Honors courses, equivalent courses or transfer credit can be used to fulfill these requirements.

2. Obtain a University of Arizona GPA of 2.0/4.0.

3. Complete the lower-division English requirement as specified by your adviser.

4. Maintain a chemical engineering GPA of 2.3.

In addition to these requirements, undergraduate students are advised that success in upper-division courses usually requires an average of C or better in the prerequisite chemical engineering courses (CHEE 201, 202 and 203). If these requirements are not met, your temporary advanced standing can be revoked, and you will then need an additional year to complete your degree requirements.

Please see your adviser to avoid problems. See the College of Engineering Advanced Standing page for more information.
